SUMMARY

Senior Front-End Engineer with 10 years of experience building scalable React and TypeScript applications across web and mobile. Strong background in performance optimization, reusable UI architecture, accessibility, testing, and API-driven frontend development. Experienced collaborating with product, design, and backend teams to deliver maintainable, user-focused interfaces in complex environments.

EXPERIENCE

Senior Front End Engineer

MilliporeSigma **October 2023 - Present, St. Louis, MO**

- Develop and optimize React-based customer-facing interfaces for sigmaaldrich.com, with focus on performance, accessibility, and maintainability.
- Implement and consume GraphQL queries to support complex, data-driven frontend experiences.
- Build reusable UI components and frontend patterns that improve consistency and support long-term scalability.
- Collaborate with product and design to translate evolving requirements into responsive, production-ready features.
- Write unit tests for UI components and data-fetching logic to reduce regressions and improve release confidence.
- Contribute to frontend architecture discussions and performance improvements across a high-visibility e-commerce experience.

Senior UI Engineer

Uptycs, Native Security **November 2020 - October 2023, Waltham, MA**

- Delivered complex, data-intensive features across web and mobile using React.js and React Native for security-focused application workflows.
- Designed and implemented scalable UI architecture using React, Redux, and modern JavaScript patterns to improve maintainability and consistency.
- Optimized application performance through memoization, lazy loading, code splitting, and render profiling.
- Built reusable cross-platform component libraries that improved UI consistency and accelerated delivery across teams.
- Collaborated with product, design, and backend engineers to deliver secure, accessible, production-ready user experiences.
- Implemented unit and integration testing with Jest and React Testing Library to improve stability and release confidence.
- Contributed to code reviews, CI/CD practices, and engineering standards across the frontend codebase.

Senior Front End Engineer (Contractor)

Ally Bank **August 2020 - November 2020, Detroit, MI**

- Contributed to the migration of a large-scale web application from Ember.js to React, modernizing feature areas while preserving stability and performance.
- Built reusable React functional components with hooks and modern ES6+ patterns.
- Used a modular, domain-driven frontend architecture across multiple feature areas.
- Improved frontend performance by reducing unnecessary re-renders and supporting memoization, code splitting, and lazy loading.
- Collaborated with backend engineers to integrate REST APIs and improve data-fetching efficiency.
- Partnered with product and design to maintain feature parity and UI consistency during the migration.
- Collaborated with the mobile team on a shared React Native component library used across the company's mobile application.
- Developed reusable React Native UI components to support cross-platform consistency on iOS and Android.

Senior Fullstack Engineer

DataStax **September 2018 - August 2020, Santa Clara, CA**

- Built and maintained React and Redux interfaces for distributed database and cloud management workflows.
- Developed interactive network visualizations using Vis.js to improve visibility into database systems.
- Used GraphQL to support efficient client-side data retrieval for complex UI workflows.
- Strengthened frontend quality through unit and integration testing.
- Partnered with QA to improve automated test coverage for evolving product features.
- Developed React Native UI components supporting mobile access to database-related functionality.

Senior Fullstack Engineer

Vibenomics **October 2017 - September 2018, Fishers, IN**

- Architected and developed a React and Redux SaaS application interface supporting client, user, and team workflows.

- Translated static design mockups into interactive, production-ready frontend components.
- Built scalable frontend functionality integrated with backend services and cloud infrastructure.
- Supported data migration and platform integration efforts across Firebase, DynamoDB, and related systems.
- Contributed to full application delivery across React, Redux, Node, and AWS-based infrastructure.

EDUCATION

Bachelor of Science in Business Information Systems

Indiana Wesleyan university • Marion, Indiana • 2015 • 3.7

SKILLS

Front End: React, React Native, TypeScript, JavaScript (ES6+), Redux, Next.js, HTML5, CSS3, SCSS, Responsive Design, Cross-Browser Compatibility, Accessibility

API / Data: REST APIs, GraphQL

Testing: Jest, React Testing Library, Cypress, Playwright

Other: Component-Based Architecture, Performance Optimization, Code Reviews, Mentorship, Clean Code Practices
